## Professional Summary

Full-Stack Developer with 7+ years experience building web, and mobile applications. Specialization in back-end development, database management, and application maintenance. 7+ years experience as a diesel mechanic. Process driven. I can always be found with my girls, at the gym, working, sim racing or watching football. Red Bull Racing fan. Ghost Cherry Limeade energy drinks consumed: 341

## Professional Experience

### Mobile App Developer

Radiant Technologies  
April 2025 – Present

iOS and Android app development from start to finish. Creation of Radiant user-facing app, back-end development, API integration, database creation, database management, app testing, and website development.

### Freelance Developer

Self-Employed  
October 2020 – April 2025

Software development of all types for personal clients, and projects. Ranging from front-end, back-end, database management, application testing, and UI/UX design to meet client needs.

### Web Developer

GoBackz  
January 2022 – February 2023

Primary web-developer. Interfaced with management to ensure quality standards, and deadlines were met. Developed website for GoBackz, created business-use database, and driver application/verification process.

### Test (Diesel) Mechanic

Kenworth Truck Company  
September 2017 – Current

Strong understanding of truck electrical systems, software programs, truck ECUs, and design of truck to diagnose, and service trucks prior to customer delivery. Utilization of computer programs to analyze, and resolve truck behavior issues. Conduction of maintenance, installing parts, and ensuring compliance with quality standards. Performing quality tests to ensure the durability, and reliability of each truck.

## Education

### Bachelors of Computer Science

Western Governors University  
Graduated: April 2025

Built upon my existing experience, knowledge, and practical expertise in software development, operating systems, database systems, and cybersecurity, preparing for modern software engineering and IT roles.
